

VACANCY FOR A (SENIOR) LOGISTICS CONSULTANT – PROJECT MANAGER

GROENEWOUT
Member of EPG

About Groenewout

Groenewout is a leading logistics consultancy firm focused on the development and implementation of logistics and supply chain operations. Our customers range from medium-sized enterprises to multinationals. We are active throughout the whole of Europe, although a significant proportion of our projects are connected to the Benelux region. Our offices are in Breda. For more details of our areas of specialization and for references, please see our website: www.groenewout.com.

About the Role

As a **(Senior) Logistics Consultant - Project Manager** at Groenewout, you are an expert in the areas of **advanced warehouse solution** and you have experience in the **planning, design and implementation of complex logistics systems**. You must be able to analyze flows of materials and information within logistics and manufacturing environments using IT tools of which some have been developed in-house, and you must also be successful in translating your analysis into practical solutions. You will be working at the heart of the logistics and supply chains operations of high-profile clients.

Key Responsibilities

- Conduct logistics studies for (new) warehouses, distribution centers and production facilities, developing warehouse design concepts.
- Advise the client on essential and desired **organizational changes** to ensure optimal functioning of the system following implementation and to provide the client with insight into future developments.
- Act as a **project manager** on behalf of Groenewout's clients during implementation, manage suppliers, from tender to acceptance testing and hypercare, taking care of project coordination with other disciplines (Building, IT, Operations, Quality, etc.).
- Act on sales opportunities, first line contact to prospects, identify opportunities at customers, developing proposals, present Groenewout's service offering.
- Role of mentor to coach fellow (junior) consultants.
- Contribute to (inter)national publications and network events, be involved in business development in your area of expertise of logistics & warehouse systems.

Your Profile

- A **bachelor's degree in Industrial Engineering/Management, Civil Engineering or Mathematics** with a specialization in logistics and mechanized systems.
- Extensive demonstratable experience of **executing logistics studies** and **implementing** new warehouse solutions.
- Strong affinity with **conceptual problem analysis** and developing **efficient and robust solutions**.

Our ref.: 9012D128/AB/IT

- Affinity with and experience within companies in the field of **logistics services, retail and e-commerce logistics** is preferred.
- Knowledge to **analyze flows of materials and information** within logistics and manufacturing environments.
- Specialism in translating the analyses into **practical solutions**. Knowledge of design and visualization tools such as **Visio, Sketch Up, AutoCAD** is an advantage.
- A professional, commercial mindset.
- A good command of **Dutch and English**, both verbally and in writing.
- Strong communication skills and ability to work in a multidisciplinary environment.
